U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No. 19

Serial Number: 08/579,395

Art Unit: 2858

- 1. The rejection of January 28, 1999 is withdrawn and the following substituted therefor:
- 2. The requirement for additional fees was sent out an May 19, 1999 because there are at least 62 claims currently in the case. Applicant added 31 claims that is, claims 32-62, without cancelling the already present claims. The already present claims are claims 1-31 and whatever other claims were in the application prior to adding claims 32-62. Applicant has added numerous claims in response to Office Actions and given claims strange numbers. It is suggested that Applicant cancel all claims in the application except for claims 32-62. This can be done by putting a statement in the next amendment such as: "Cancel all claims except claims 32-62." Currently Applicant owes at least \$788.00 in added fees because claims 1-31 are still active. If all claims other than claims 32-62 are cancelled Applicant will not owe anything additional.
- 2. Claims all in the application are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear what all the claimed elements and steps are and it is not clear how they are interconnected and interrelated to produce the desired results. It is requested that a reading of each of the independent claims be provided with respect to a figure or figures of the drawings.
- Claims all in the application are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The disclosure is presented in theoretical terms without ever presenting

Art Unit: 2858

what one would do to construct the apparatus of the invention. It is not clear how the invention would be made and used.

- Claims all in the application are rejected under 35 U.S.C. 112, first paragraph, 4. because the best mode contemplated by the inventor has not been disclosed. Evidence of concealment of the best mode is based upon no workable physical description being presented.
- The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the 5. basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or 6. on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims all in the application are, insofar as understood, rejected under 35 U.S.C. 102(b) as 7. being fully anticipted by Swain, Schroeder or VanZanten et al.
- The Examiner does not understand the structure or operation of the invention. It is 8. suggested that Applicant arrange a personal or telephone interview to maybe aid in understanding.
- Any inquiry concerning this communication should be directed to Ernest Karlsen at 9. telephone number (703) 305-4768.

Karlsen/dc January 14, 2000
